| | QTR Progress | YTD Progress | Notes |
|---|-----------------|-----------------|---|
| Total Fund | - | - | YTD and Quarter behind index due to underperformance within Domestic Equity and Real Estate. Long term returns ahead of index. |
| Fidelity S&P 500 / Extended / Developed Market Index Funds | = | = | Performed inline with expectations for index fund. |
| Seizert Large Value | - | - | Near term weakness due to Technology. Long term remains strong. |
| Winslow Large Growth | - | - | Underperformance driven by underweight to Magnificent 7 names. |
| Clarkston Small / Mid | - | - | Clarkston is on watch. |
| Seizert Mid Cap | + | - | Outperformance driven by overweight to Industrials. Long term outperformance across the board. |
| Seizert Small Cap | - | - | Near term underperformance due to stock selection in Tech and healthcare. Long term outperformance across the board. |
| Reinhart Small Mid Cap | - | - | Near term underperformance due to index performance driven by low quality names. Long term outperformance across the board. |
| Hudson Edge International Equity | - | + | New addition to the portfolio, outperforming. |
| ABS Emerging Markets | + | + | Outperformance across the board. |
| Boyd Watterson Fixed Income | + | + | Outperformance across the board. Minor |
| Private Credit – Raven / Monroe | + | + | Long term performance remains solid. Raven is nearing end of investment period; Monroe is actively deploying capital. Raven ahead of expectations, Monroe roughly 60% deployed. |
| Intercontinental US REIF | + | + | Outperformance across the board for 2025. Longer term returns (3 year and 5 year) impacted by higher leverage than peers. |
| Boyd Watterson GSA Real Estate | + | + | Outperformance across the board |
| Alidade Real Estate Fund IV | + | + | No pricing update due to timing of quarterly statements. Long term performance remains solid. |
| TerraCap Real Estate Fund IV / V / VI | - | - | Impact of re-pricing of office assets impacting fund returns. Fund IV is actively working to recover as much capital as possible. Fund V is still early in life. Fund VI just starting to deploy capital. |

September 30, 2025

Investment Managers shall be monitored on the 9 criteria outlined below each quarter. Failure to meet 3 of the listed criteria will result in placement on a Watch List.

- 1. Three out of four (4) consecutive quarters of relative under-performance versus the benchmark.
- 2. Three (3) year trailing return below the top 50th percentile and underperformance vs. benchmark.
- 3. Five (5) year trailing return below the top 50th percentile and underperformance vs. benchmark.
- 4. Three (3) year downside volatility less than the index (lower than 100), as measured by down mkt ratio.
- 5. Five (5) year downside volatility less than the index (lower than 100), as measured by down mkt ratio.
- 6. No investigation of the firm by the Securities and Exchange Commission (SEC).
- 7. No merger or sale of firm.
- 8. No qualitative changes (style, purity drift, mgmt turnover, asset flows, 314 / IPS compliance)
- 9. No fee increases without prior written consent.

Monroe County Employees Retirement System
Historical Notes
As of September 30, 2025

Historical market value and performance data through September 2017 was provided by Morgan Stanley.

Market values, performance and cash flow information beginning October 2017 to date was prepared by Mariner Institutional from statements provided by Comerica Bank, Fifth Third Bank, and the investment managers.

Active Return

- Arithmetic difference between the manager's performance and the designated benchmark return over a specified time period.

Alpha

- A measure of the difference between a portfolio's actual performance and its expected return based on its level of risk as determined by beta. It determines the portfolio's non-systemic return, or its historical performance not explained by movements of the market.

Beta

- A measure of the sensitivity of a portfolio to the movements in the market. It is a measure of the portfolio's systematic risk.

Consistency

- The percentage of quarters that a product achieved a rate of return higher than that of its benchmark. Higher consistency indicates the manager has contributed more to the product's performance.

Distributed to Paid In (DPI)

- The ratio of money distributed to Limited Partners by the fund, relative to contributions. It is calculated by dividing cumulative distributions by paid in capital. This multiple shows the investor how much money they got back. It is a good measure for evaluating a fund later in its life because there are more distributions to measure against.

Down Market Capture

- The ratio of average portfolio performance over the designated benchmark during periods of negative returns. A lower value indicates better product performance

Downside Risk

- A measure similar to standard deviation that utilizes only the negative movements of the return series. It is calculated by taking the standard deviation of the negative quarterly set of returns. A higher factor is indicative of a riskier product.

Excess Return

- Arithmetic difference between the manager's performance and the risk-free return over a specified time period.

Excess Risk

- A measure of the standard deviation of a portfolio's performance relative to the risk free return.

Information Ratio

- This calculates the value-added contribution of the manager and is derived by dividing the active rate of return of the portfolio by the tracking error. The higher the Information Ratio, the more the manager has added value to the portfolio.

Public Market Equivalent (PME)

- Designs a set of analyses used in the Private Equity Industry to evaluate the performance of a Private Equity Fund against a public benchmark or index.

R-Squared

- The percentage of a portfolio's performance that can be explained by the behavior of the appropriate benchmark. A high R-Squared means the portfolio's performance has historically moved in the same direction as the appropriate benchmark.

Return

- Compounded rate of return for the period.

Sharpe Ratio

- Represents the excess rate of return over the risk free return divided by the standard deviation of the excess return. The result is an absolute rate of return per unit of risk. A higher value demonstrates better historical risk-adjusted performance.

Standard Deviation

- A statistical measure of the range of a portfolio's performance. It represents the variability of returns around the average return over a specified time period.

Total Value to Paid In (TVPI)

- The ratio of the current value of remaining investments within a fund, plus the total value of all distributions to date, relative to the total amount of capital paid into the fund to date. It is a good measure of performance before the end of a fund's life

Tracking Error

- This is a measure of the standard deviation of a portfolio's returns in relation to the performance of its designated market benchmark.

Treynor Ratio

- Similar to Sharpe ratio but utilizes beta rather than excess risk as determined by standard deviation. It is calculated by taking the excess rate of return above the risk free rate divided by beta to derive the absolute rate of return per unit of risk. A higher value indicates a product has achieved better historical risk-adjusted performance.

Up Market Capture

- The ratio of average portfolio performance over the designated benchmark during periods of positive returns. A higher value indicates better product performance.

Mariner Institutional compiled this report for the sole use of the client for which it was prepared. Mariner Institutional is responsible for evaluating the performance results of the Total Fund along with the investment advisors by comparing their performance with indices and other related peer universe data that is deemed appropriate. Mariner Institutional uses the results from this evaluation to make observations and recommendations to the client. Mariner Institutional uses time-weighted calculations which are founded on standards recommended by the CFA Institute. The calculations and values shown are based on information that is received from custodians. Mariner Institutional analyzes transactions as indicated on the custodian statements and reviews the custodial market values of the portfolio. As a result, this provides Mariner Institutional with a reasonable basis that the investment information presented is free from material misstatement. This methodology of evaluating and measuring performance provides Mariner Institutional with a practical foundation for our observations and recommendations. Nothing came to our attention that would cause Mariner Institutional to believe that the information presented is significantly misstated.

This performance report is based on data obtained by the client's custodian(s), investment fund administrator, or other sources believed to be reliable. While these sources are believed to be reliable, the data providers are responsible for the accuracy and completeness of their statements. Clients are encouraged to compare the records of their custodian(s) to ensure this report fairly and accurately reflects their various asset positions.

The strategies listed may not be suitable for all investors. We believe the information provided here is reliable, but do not warrant or guarantee its accuracy or completeness. Past performance is not an indication of future performance. Any information contained in this report is for informational purposes only and should not be construed to be an offer to buy or sell any securities or any investment advisory services.

Please note that Neuberger Berman (NB) owns a non-controlling minority stake in Mariner. Certain NB strategies may hold an allocation to the investment in Mariner. For specific impacted strategies, please reach out to your investment consultant or Mariner Institutional at institutionalcompliance@mariner.com
